Professional Summary

Software Engineer with 1.8+ years of experience developing multi-tenant SaaS and GPS/IoT platforms using C#, .NET, ASP.NET Core, Blazor, .NET MAUI, PostgreSQL, RabbitMQ and SignalR. Experienced in real-time GPS processing, GT06 protocol integration, REST APIs, map matching, authentication, payment gateways, notifications and production troubleshooting across web and mobile applications.

Experience

Software Engineer April 2025 – Present
OptByte Software Solutions *Pune, India*

- Developed and maintained a multi-tenant GPS tracking SaaS platform for real-time vehicle monitoring, fleet management, route playback, alerts and organization-based access across web and mobile applications.
- Engineered backend services using C#, .NET 8/9 and ASP.NET Core, building REST APIs, Entity Framework Core data models and background services on PostgreSQL to support multi-tenant operations.
- Implemented GT06-based GPS device communication and packet processing for heartbeat, location, LBS, alarm, ignition and power events across multiple tracker models.
- Built event-driven real-time processing using RabbitMQ and SignalR for asynchronous GPS event handling and tenant-aware live vehicle updates over WebSockets.
- Implemented GPS filtering, movement/stop detection and 2D Kalman filtering, with OSRM map matching and Google Maps/Leaflet visualization for accurate route tracking.
- Developed responsive Blazor web interfaces and .NET MAUI Blazor Hybrid applications for Android/iOS, covering vehicle tracking, playback, documents, reminders, settings and Firebase push notifications.
- Integrated Microsoft Identity/Azure AD/MSAL authentication, Firebase, SMS/IoT services, Airtel IoT/M2M, Jio Trueconnect, Google APIs and Cashfree payment workflows for SaaS onboarding and subscriptions.

Technical Skills

Languages: C#, SQL, Jave, JavaScript, TypeScript, Python, C
Backend: .NET 8/9, ASP.NET Core, REST APIs, Entity Framework Core, Background Services, Dependency Injection
Frontend: Blazor, React, HTML5, CSS3, Tailwind CSS, JavaScript
Mobile: .NET MAUI, Blazor Hybrid, Android, iOS
Database: PostgreSQL, SQL
Messaging / Real-Time: RabbitMQ, SignalR, WebSockets, Event-Driven Architecture
GPS / IoT: GT06 Protocol, GPS Tracking, GPS Packet Parsing, LBS, IoT Device Communication, GPS Filtering, Kalman Filter
Maps: Google Maps, Leaflet, OpenStreetMap, OSRM, Map Matching, Route Snapping
Auth / Services: Microsoft Identity, Azure AD, MSAL, Firebase, Google APIs, SMS Gateways, Airtel IoT/M2M, Jio Trueconnect, Cashfree
Tools: Git, GitHub, Visual Studio, VS Code, Postman

Projects

GPS Tracking & IoT SaaS Platform | *C#, .NET, ASP.NET Core, RabbitMQ, SignalR, PostgreSQL*

- Designed core GPS processing pipeline handling GT06 protocol parsing, RabbitMQ-based event queuing and SignalR live updates for a multi-tenant fleet management platform.
- Built OSRM-based map matching and route snapping to improve GPS accuracy for web and mobile tracking clients.

AI-Based Real-Time Earthquake Impact Assessment | *Python, Streamlit, Scikit-learn, XGBoost*

- Built a machine learning risk-scoring model using Scikit-learn and XGBoost to assess real-time earthquake impact from live data feeds.
- Developed an interactive Streamlit dashboard with Folium and Plotly visualizations for geographic risk mapping and analysis.

Academic Projects

- **AI-Based Real-Time Earthquake Impact Assessment** (Python): An AI-powered platform for real-time earthquake impact assessment and geographic risk analysis.
- **Online Job Portal** (Java, Sprig Boot, React): A full-stack job portal for seamless job searching and recruitment management.

Education

Abeda Inamdar Senior College of Arts, Science and Commerce, SPPU 2027
Master of Computer Science (MCS)
Abeda Inamdar Senior College of Arts, Science and Commerce, SPPU 2025
Bachelor of Computer Science (BCS)
